Is the BIGFOOT token accessible, does it have any utility?

\$BIGFOOT is a crypto token native to the Solana network. The amount of people using Solana network has grown by several million this year alone. Quickly becoming a favorite network for both developers and users the SOL network is much faster and much cheaper (up to 50x cheaper) than the older Ethereum Network which is used by SHIB. Since BIGFOOT is native to Solana network \$BIGFOOT can be used in thousands of decentralized applications much more quickly and much less

AUDIT

We believe in our security.

How do I buy BIGFOOT Token?

Currently BIGFOOT are available on Raydium here. We strongly believe in the true nature of crypto and the freedoms decentralized exchanges offer our users. Early in it's development BIGFOOT will only be available on DEX exchanges but at some time in the near future BIGFOOT will become available on centralized exchanges as well.

NEXT GEN NFTS MULTI-BLOCKCHAIN USE ENDLESS POSSIBILITIES

Skeletor is here to stay. No idea is too big, no task is too complex with the support of our community. DAO proposals and voting will lead Skeletor in a positive direction fully decided on by \$SKELETOR holders.
